RESOLVED That the Design Commission, having considered designs for the construction of Kissena Greenway, as part of the Destination Greenways! Master plan, including Kissena Corridor Park, Kissena Park, and Kissena Park Golf Course Connection, Flushing, Queens, submitted by the Department of Parks & Recreation, represented by exhibits 7824-E, F, G, H & I of record in this matter, hereby gives to the same unanimous preliminary approval with the understanding that the team will (1) consider specifying tinted concrete for the bike rack and trash receptacle pad so it better blends into the greenway; (2) provide detailed drawings for the pre-cast concrete boardwalk, illustrating how water would drain; (3) incorporate updated pavement markings into the drawings, paying particular attention to the nodes where the greenway separates into a pedestrian pathway and bike lanes; (4) consider specifying deterrent elements, such as boulders, within the planting beds at the intersections to prevent users from creating desire paths; (5) study removing the planted area from the Kissena Boulevard West plaza to create a bigger arrival node for enhanced user safety; and (6) coordinate with the district's Maintenance & Operations team to (a) provide a preliminary maintenance and operations plan and an estimated maintenance budget for the permeable asphalt path that includes periodic vacuum-based cleaning and (b) revise the greenway design as necessary to account for vacuum truck operation.

Preliminary approval is conditioned upon submission of this project for final review and approval before June 22, 2028.

RESOLVED That the Design Commission, having considered designs for the reconstruction of the Manhattan Detention Complex, 125 White Street, Manhattan, submitted by the Department of Design and Construction and DOC and the Department of Transportation, represented by exhibits 4724-DX, DY, DZ, EA, EB, EC & ED of record in this matter, hereby gives to the same unanimous preliminary approval with the understanding that, in an interim submission before returning for final review, the team will (1) (a) reconsider the gradient frit design at the southwest façade, which seems decorative and out of place in contrast to the timeless design for the tower facades and (b) provide material samples; (2) for the signage and wayfinding, (a) simplify the signage typologies, particularly at the staff entrance, where three distinct types of signs are proposed and (b) reconsider the use of freestanding signs, as these are typically used for a campus setting; (3) for the streetscape elements, (a) continue to study the tone proposed for the bollard sleeves, light poles, flag poles, and handrails, so that these recede into the streetscape, potentially by reconsidering the 'Dark Copper' finish and specifying a darker 'Grey' or stainless steel material and (b) reconsider the coating type for the bollard sleeves, noting that an applied coating is difficult to maintain and a cast material may be more durable; and (4) restudy the tree pit that extends into the Centre Street sidewalk bump-out, which could lead to maintenance issues and desire paths.

Preliminary approval is conditioned upon submission of this project for final review and approval before June 22, 2028.
